Covid-19 /
Pandemic

The new virus spread from the Chinese city of Wuhan to China and to the rest of the world in two months.

This news is being managed in a not very clear way, causing fear and panicness in the minds of the population around

What the media say

The media are giving maximum importance to this event, subtlely clarifying how dangerous the virus can be and without making the origin clear.

Social impact

Thanks to the attention received by the media, people around the world are adapting to a new virus, yes, the virus that has stopped almost

Limitations / future work

The main limitation I have found has been managing the database. I have found it very inconsistent data but at the same time many interesting points.

For a future job I would like to continue analyzing the network because it can be squeezed much more.
